METHOD AND SYSTEM FOR PROACTIVELY REDUCING THE OUTAGE TIME OF A COMPUTER SYSTEM

ABSTRACT OF THE DISCLOSURE

9

A method (and system) of reducing a time for a computer system to recover from a degradation of performance in a hardware or a software in at least one first node of the computer system, includes monitoring a state of the at least one first node, and based on the monitoring, transferring a state of the at least one first node to a second node prior to the degradation in performance of the hardware or the software of the at least one first node.
